

On the Subject of Shiro's birthday

When you have so many birthday you must know how to organize the best parties.

- Count all your birthday hats, make sure there is enough for every walters or they will start rampaging the place.
- There is cake ! it's not a lie. Every group of walter will eat a cake so make sure there is enough cake for them all or they might eat everthing at the house.
- The more the merrier, count every happy walter attending the party ! you can also count unhappy walters.
- With all this information you can get a party meter ! if the party meter is at least of 100% Do not stop the party because it's your birthday! for the entire bomb's duration.

Birthday hat	20%
Birthday cake	20%
walter	10%
group of walter	30%

- For a party meter of less than 30% it's an horrible party, minutes drag on, you must watch the second number of the timer.
- If it's more than 30% then it's a pretty good party, seconds fly by, then watch the third number of the timer.
- And the most important ! you MUST count your strikes !
- Substract unhappy types of attendees from the meter, groups of walters might not be satisfied with a lack of cakes but alone walters with enough hats are still happy.

		Strike Number	
		Odd	Even
Timer number	Odd	It's your birthday	It's not your birthday
	Even	It's not your birthday	It's your birthday
